students.extend(["Hari", "Ajay"])  
print("After extend =", students)
```

```
# 3. insert()  
students.insert(1, "Rahul")  
print("After insert =", students)
```

```
# 4. remove()  
students.remove("Bala")  
print("After remove =", students)
```

```
# 5. pop()  
students.pop()  
print("After pop =", students)
```

6. index()

```
print("Index of Kevin =", students.index("Kevin"))
```

7. count()

```
print("Count of Kevin =", students.count("Kevin"))
```

8. sort()

```
students.sort()
```

```
print("After sort =", students)
```

9. reverse()

```
students.reverse()
```

```
print("After reverse =", students)
```

10. copy()

```
student_copy = students.copy()
```

```
print("Copied Students =", student_copy)
```

11. clear()

```
temp_students = students.copy()
```

```
temp_students.clear()
```

```
print("After clear =", temp_students)
```

12. sum(), min(), max(), len()

```
marks = [85, 72, 90, 68]
```

```
print("Marks =", marks)
print("Total Marks =", sum(marks))
print("Minimum Mark =", min(marks))
print("Maximum Mark =", max(marks))
print("Number of Marks =", len(marks))
```

OUTPUT:

```
Original Students = ['Arun', 'Bala', 'Kavin', 'Ravi']
After append = ['Arun', 'Bala', 'Kavin', 'Ravi', 'Vijay']
After extend = ['Arun', 'Bala', 'Kavin', 'Ravi', 'Vijay', 'Hari', 'Ajay']
After insert = ['Arun', 'Rahul', 'Bala', 'Kavin', 'Ravi', 'Vijay', 'Hari', 'Ajay']
After remove = ['Arun', 'Rahul', 'Kavin', 'Ravi', 'Vijay', 'Hari', 'Ajay']
After pop = ['Arun', 'Rahul', 'Kavin', 'Ravi', 'Vijay', 'Hari']

```

PROBLEM:2

INPUT:

```
my_list = ["Anu", "Bhavya", "Bhuvana"]
```

```
my_list.append("Vaishu")
```

```
print(my_list)
```

OUTPUT:

```
['Anu', 'Bhavya', 'Bhuvana', 'Vaishu']
```

PROBLEM:3

INPUT:

```
# extend()
```

```
a = ["python", "java"]
```

```
b = ["my sql", "HTML", "CSS"]
```

```
a.extend(b)
```

```
print(a)
```

OUTPUT:

```
['python', 'java', 'my sql', 'HTML', 'CSS']
```

PROBLEM:4

INPUT:

```
A = ["laptop", "mouse", "keyboard", "monitor"]
```

```
A.remove("keyboard")
```

```
print(A)
```

OUTPUT:

```
['laptop', 'mouse', 'monitor']
```
